Challenge

Fusion Living began their journey selling into the UK market. However after some time, they decided to push the brand further by expanding internationally. Their visualsoft platform allowed them to start receiving european orders and begin their market entry into the EU.

Due to a lot of requirements such as language, tax implications, providing localised payments, they needed to find a partner to help lower those barriers to grow their brand further.

An insight into Fusion Living

Fusion Living began in 2011, it started thanks to a network of furniture suppliers which Carley had developed over time whilst she was a design interior. With access to a considerable catalogue of furniture products, she saw a niche to provide the UK market with high quality, but also exceptional customer service.

The business has been built up over the last 10 years, steadily growing it's product base but also providing 5 star customer service to all of their clients. Giving the best customer experience has always been their ultimate goal and is what sets them apart from traditional stores.

Solution

Glopal's international Shopping Ads solution helped Fusion Living grow their international sales in two ways:

1. Full store localization

Fusion Living's site was translated into each language of their chosen markets, along with currency conversion. This drove a huge increase in conversion due to buyers being given a localized experience.

2. Enter new markets with international campaigns

New global markets were identified and Glopal's localized international campaigns drove huge sales growth with Shopping Ads, enabling Fusion Living to scale their sales into new markets.

Results

Fusion Living saw a 374% increase in international sales in the first 30 days of joining Glopal.

Thanks to the most comprehensive and secure end-to-end localized shopping experience, they have noted a substantial improvement in the ROAS.

Fusion Living are now seeing international sales growth in a variety of markets.
